e-Licensing Management

Cross stakeholder e-License management service to provide operators and software providers and consumers the mechanisms to trustworthy control the usage of the purchased resource in real-time, verifying the compliance of the smart contract and providing prove of usage related to the licensing costs.

eLM offers the following functionalities:

- Multi domain
- Customizable licensing metrics to match different business plans (flat rate, pay-as-you-grow, subscription)
- Full automation
- xNF compatibility
- NFV Orchestrator agnostic
- Infrastructure agnostic
- Small footprint
